Weekly Schedule

Activity	Meeting Time
Applied Lessons	Scheduled individually and set for the semester
Studio Class	Mondays, 4:00–4:50 p.m.
Percussion Ensemble	Tuesdays and Thursdays, 4:00–4:50 p.m. (fall 2026); 2:00–3:15 p.m. (spring 2027)

Expectations

Everyone performs in Studio Class and Percussion Ensemble. Percussion Ensemble is an essential lab experience of applied study; majors do not audition.

Keep a lesson notebook: assignments, technical and musical comments, goals, studio class materials, practice logs. The shared Google Doc is not enough.

Bring sticks, mallets, music, a pencil, and your lesson log to every lesson.

> **Attend every equipment move** for any ensemble you are in. Failing to attend and assist reduces your grade.

> **B.M. and B.A. students practice two hours a day.** Non-majors, one hour.

Attendance & Communication

Give notice by the night before if you cannot attend a lesson: email, text, or call. Late notice affects your grade. Missed lessons are made up at a time convenient to both of us.

You have two free absences across lessons, studio class, and ensemble combined. Choose them wisely: each one after the second drops your final grade a letter.

Grading

Assuming consistent attendance, grades are assigned as follows:

A	Superior. Accurate, musically sensitive performance of the weekly goals, with steady development.
B	Above average. Stylistic awareness, largely accurate mechanics, most assigned material performed successfully.
C	Average. Less than desirable progress; good understanding, but inconsistent accuracy and erratic development.
D	Below average. Numerous repetitions, stops and starts, erratic tempo, weekly goals unmet.
F	Minimal performance standards not met.

Lessons and studio class performances are graded on preparation and growth, not perfection.

Practice Rooms

Room 288 is the main percussion room: the 5.0-octave Yamaha YM-5100 marimba, Musser vibraphone, four Ludwig timpani, the snare collection, drum sets, and storage.

Sign up on the posted schedule for up to two hours a day. A reserved slot may be taken over if you are more than ten minutes late (lights off, room empty).

Three further rooms hold a 4.3-octave Musser kelon marimba, a 4.0-octave Musser rosewood, and a xylophone. Room 134 is also available, with a full complement.

Percussive Arts Society

Join the Percussive Arts Society at www.pas.org: $50 a year for members 26 and under, $75 standard.

PASIC runs each November in Indianapolis, now its permanent home through 2028. PASIC 2026 is November 11–14. You are strongly encouraged to attend.

Part Two

The Skills Assessment Test

You must pass the Skills Assessment Test before performing the **Junior Recital (MUAP 3199)** or **Senior Recital (MUAP 4199)**. It demonstrates the fundamental skills successful performance rests on.

> **Attempts.** Once per semester. Tests are given during jury week.

The Three Components

1 Scales ♩ = 100

Major	Block chords (four mallets), arpeggios in inversions (four mallets), major scales (inner mallets), and arpeggios (two mallets). Three octaves in practical range, performed from memory.
Harmonic Minor	Block chords (four mallets), arpeggios in inversions (four mallets), harmonic minor scales (inner mallets), and arpeggios (two mallets). Three octaves in practical range, performed from memory.
Chromatic	Performed from memory through the practical range of the instrument.

2 Rudiments

All 40 Percussive Arts Society International Drum Rudiments, performed from memory. Each rudiment must be played eight times in succession without error.

3 Sight-Reading

Snare drum, timpani, and two-mallet keyboard. Read at sight a piece that is idiomatic to the instrument and level-appropriate.

How the Test Is Scored

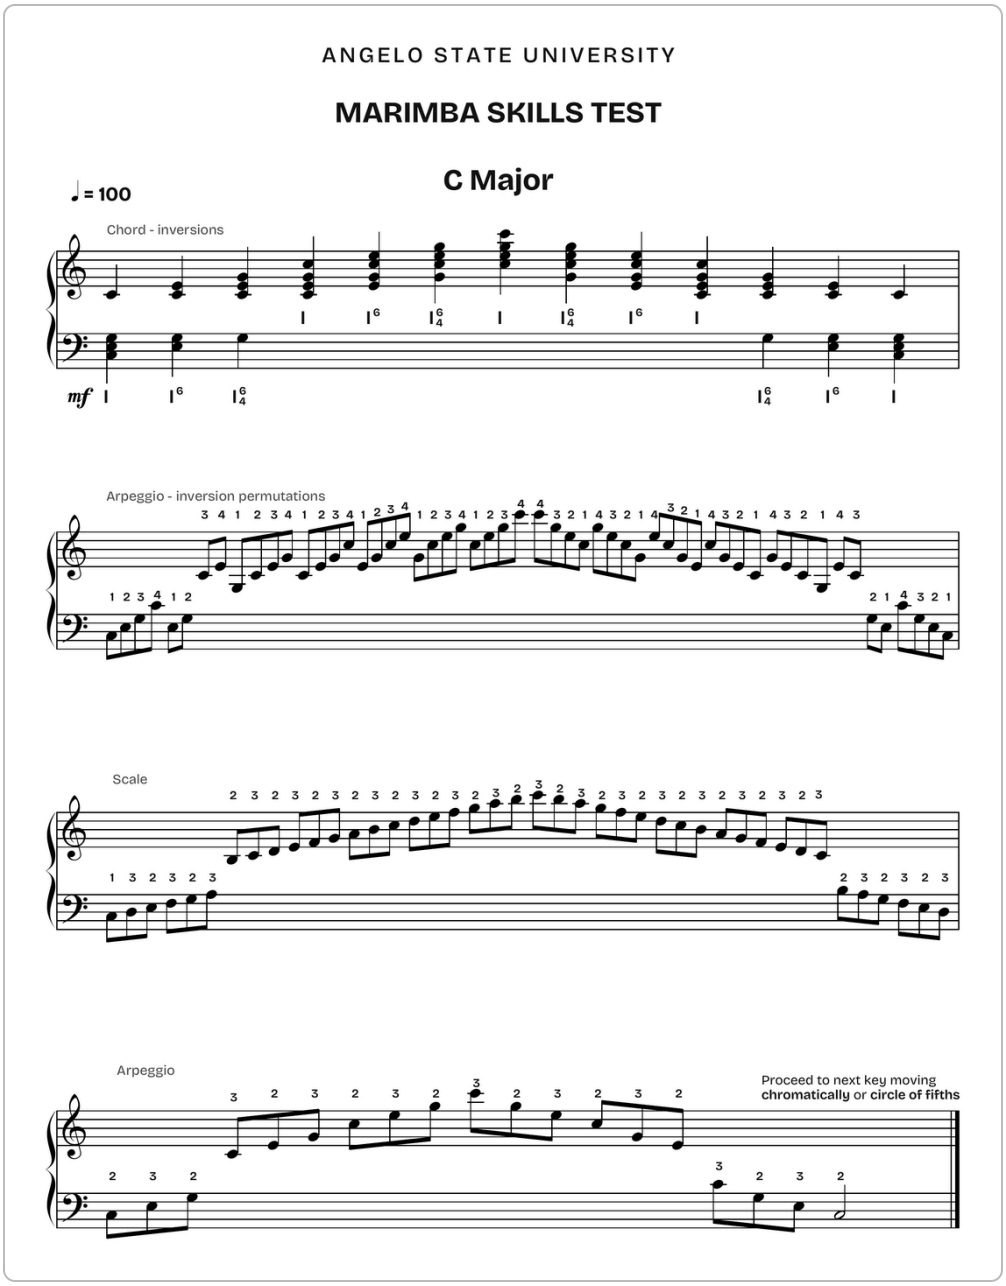

You prepare everything; the panel selects. Every key, all forty rudiments, and all three instruments must be ready: what you play on the day is drawn from that pool.

Component	Drawn	To Pass
Major keys	4 drawn	All 4 must pass
Harmonic minor keys	4 drawn	All 4 must pass
Rudiments	4 drawn	All 4 must pass
Sight-reading	3 readings	2 of 3 must pass

> Preparing only what you expect to be asked is the most common way this test is failed. Prepare the pool.

What a Prepared Key Looks Like

C major from the marimba packet: chord inversions, arpeggio permutations with stickings, and the scale, in the form the test expects. The full packet covers every key and is distributed separately as *ASU Skills Test: Major Keys*.

C major · chord inversions, arpeggio permutations with stickings, scale, and arpeggio

> **Harmonic minor.** The packet is written out in major only. For each harmonic minor key, apply the same pattern in the minor mode.

Required Equipment

Snare Drum

Concert snare sticks	Innovative IP1 (IPJC, IPJC2, or equivalent); Copperman; Vic Firth SD1 or Symphonic Signature Ted Atkatz SATK

Keyboard Percussion

Glockenspiel	Innovative IP906 or Malletech ORR48 Phenolic, one pair
Ensemble xylophone	Innovative IP905 or Malletech Plastic, one pair
Solo xylophone	Innovative IP902 or Malletech BB34 Poly, one pair
Crotales	Innovative IP760R Aluminum, one pair
Vibraphone	Malletech Dave Samuels DS18, two pair
Marimba	Vic Firth Robert van Sice M114, two pair (M113, M112, and M115 also useful)
Marimba	Innovative ENS360 Hard Rubber, two pair

Timpani

Timpani mallets	Cloyd Duff #2, #4, #6, #10
Tuning fork	A-440

Drum Set

Sticks	Innovative or Vic Firth 5A; Vic Firth 8D for jazz; or comparable
Brushes	Wire brushes

Accessories

Buy once and buy well: this equipment outlasts the degree.

Item	Recommended	Notes
Metronome	Boss Dr. Beat (DB-90) or comparable	*Must subdivide, and must take headphones. Phone apps are for convenience, not for lessons.*
Practice pad	Gum-rubber or comparable practice pad	*For dorm and travel practice. Bring it to studio class when asked.*
Hearing protection	Musician's earplugs (ER-20 or custom-molded)	*Required for drumline, ensemble, and drum set work. Your ears are the one instrument you cannot replace.*
Suspended cymbal & woodblock mallets	Ron Vaughn LBM-3R or CYMM-4R	*One pair of each.*
Triangle	Abel, Black Swamp, Grover, Sabian HH, or Studio 49	*Buy the best single triangle you can afford before you buy a second one.*
Triangle beaters	Black Swamp Spectrum or Stoessel-Weiner	*A graduated set. One size will not cover the literature.*
Tambourine	Black Swamp or Grover	*A 10" double-row instrument is the general-purpose choice.*
Woodblock	Black Swamp	
Castanets	Epstein	*Mounted paddle castanets.*
Bass drum mallets	Vic Firth Gauger	
Mallet bag	Large-capacity bag or roll	*It must hold everything above and survive being loaded into a truck.*

Purchasing Music & Supplies

Buy your music and books. Photocopies are illegal and not acceptable; failing to obtain assigned music reduces your grade.

Marimba Fundamentals

- Play in the center of the naturals and at the extreme edge of the accidentals. Two exceptions: in the lowest octave of a 5.0 marimba, slightly off center (still within the resonator) strengthens the fundamental against the double-octave overtone; in the top octave, play accidentals in the center too.
- Keep all mallets aligned to those spots. As a visual aid, run two lengths of white acrylic yarn: one across the centers of the naturals, one half an inch in front of the accidentals. Strike on the line for naturals, in front of it for accidentals.
- Stand back far enough that the mallets' natural position (elbows forward of the shoulders, even with the front of the torso) falls on the center of the naturals. Keep the hips still; move the hands.
- The two-mallet tremolo strikes the center or end of the bar, positioned as on snare. Rotate the wrists slightly outward until the thumb reaches about 45 degrees so the mallets clear each other.
- Match tremolo speed to the resonance of each bar.

George Hamilton Green: *Instruction Course for Xylophone*

- Read all the text: introduction and individual lessons.
- Hold one tempo per lesson, especially the first two pages. "Ragtime" may take a different tempo; hold it for the whole page. Half tempo for double stops and repetitive single-hand motion.
- Accuracy first, then velocity. Start slow enough for complete accuracy, then raise the tempo in steps only while accuracy holds: Lesson One might run half note = 60, 80, 100, 120.
- Analyze the harmonic basis of each exercise, the ragtime studies especially. Call out the chord changes while playing, without writing them in.

Leigh Howard Stevens: *Method of Movement for Marimba*

- Read all the text, even if you do not use Stevens grip: the principles apply to every grip.
- Work the Daily Exercise Routines chart at the back across the layers and down the levels. See my expanded D.E.R. chart.
- Transpose through all twelve keys by whole steps, not chromatically: up one whole-tone scale to the octave, down the other a half step lower, ending where you began.
- Analyze the structure and harmonic basis of each exercise.

Bart Quartier: *Image*

- Read all the text, including the performance notes.
- Treat the printed tempos as goals: a few are optimistic. Build to them while holding accuracy and phrasing.
- Apply standard phrasing on top of the printed dynamics.
- Quartier's companion volume, *Imagine*, is an excellent guide to *Image*. Recommended.

Basics of Timpani Technique

Timpani Systems

- American system: low drum on the left.
- German system (traditional): low drum on the right.

Ranges & Typical Notes

Drum	Range	Typical Notes
32"	D–A (low C on some drums)	D, E, F, G
29"	F–C	A, B, C
26"	B♭–F	D, E, F
23"	D–A	F, G, A
20"	F–C	A, B, C

Accidentals are available throughout each range.

Stick Assortment

Match stick choice to articulation, not to dynamics.

- Soft white damper felt: "large ball" or "cartwheel."
- Medium white damper felt: "medium ball" or "general."
- Hard white damper felt: "small ball" or "staccato."
- Wood, or chamois-covered wood.

Tuning

Ear Development

- Match pitches.
- Write out, memorize, and practice singing intervals up and down.
- Sing intervals against a tuning fork (A-440).

Basic Method

- Listen to the pitch.
- Sing the pitch.
- Think the pitch.
- Tap the head once with a finger, never a stick.
- Raise the pitch to match the pitch in your mind's ear.
- Sing to check the drum.
- Make corrections.

Playing Technique

Grips

- French: thumbs on top; finger and forearm motion.
- German: hands on top; wrist and arm motion.

Basic Stroke

- Imitate and assist the natural rebound: lift.
- Dynamics are controlled by stroke height.
- Articulation is controlled by stroke speed.

Rolls

- Unmeasured.
- Match roll speed to pitch and resonance: slower low, faster high; faster soft, slower loud.
- Every roll has three parts: attack, sustain, release.

Position

- Between the tension rods, three to four inches from the edge.
- Hands roughly six inches apart (the length of a dollar bill).
- Closed position for rhythms; open position for rolls.

Muffling

- Direct pressure with the last three fingers.
- Muffle to match the ensemble's articulation, to clear between drums, and to drop from loud to soft.

Phrasing

- Bring out the lower drums, slightly louder.
- Bring out smaller note values, weak parts of the beat, and grace notes.
